FOCUS

ICE CREAM & DISPLAY FREEZER

Used all over the world due to inspiring design, high reliability, low service need and very low energy consumption. So plug it in and it will run for years.

High quality freezers.

With the FOCUS freezer, Elcold has succeeded to include two very different parameters into one unit: Elegance but still robust. The result is an optimal way to catch the attention of your customers. The lid design, the improved insulation and the heated frame ensure minimum ice build-up.

Heavy investment in new technology has resulted in very low energy consumption and use of the environmental friendly hydro carbon gas. Cyclopentane is used as blowing agent.

Reduced energy consumption

Our Focus units meet the requirements from EU by 1. September, 2023- called Ecodesign. The short version is that all these products are only allowed to use 50 % of the energy compared to 2019. To do this, we have had our focus on lids and compressors- now using energy friendly hydrocarbon refrigerants such as R290 and R600A.

FEATURES

- Up to 50 % reduced energy consumption compared to 2019.
- Reduced ice build-up due to improved lid system
- 75 mm insulation
- Curved sliding glass lids
- Thermometer
- Castors
- Options:
 - Baskets
 - Dividers
 - Lock

- LED
- Graphics (minimum quantity required)
- Castors with brake

 - Castors with brake

| FOCUS |

ICE CREAM & DISPLAY FREEZER

UP TO 50 % REDUCTION OF ENERGY CONSUMPTION

The key words are: Elegant features to attract the attention of your customers, but still robust.

Further the lids are integrated into the frame, which will ensure minimum ice build up.

All the freezers meet the EU-Ecodesign requirements for lower energy consumption and show a reduction of up to 50 % compared to 2019.

We are proud that we have achieved this goal. To do this, we have had our focus on lids with higher insulation values and compressors, using less energy and energy friendly hydrocarbons refrigerants such as R290 and R600a.

ICE CREAM & DISPLAY FREEZER

UP TO 15 % REDUCTION OF ENERGY CONSUMPTION

The key words are: Elegant features to attract the attention of your customers, but still robust.

Further the lids are integrated into the frame, which will ensure minimum ice build up.

Recently the lids were improved – now meaning a saving of the overall energy consumption of approx. 15 %.

This feature is brand new and not yet included into the official energy consumption data
